DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 52-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are drawn to a composition comprising a compound produced according to *claim 1*; however, claim 1 has been cancelled. Therefore, there is no compound to refer to, and the instant claims are rendered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 52-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Spino et al (Tet. Lett. 1996).

The reference discloses a mixture comprising a (-)-(S)- β -hydroxy ester of formula (6) and 4-phenylbutan-2-one (p 6504, line 4). The intended use of the composition (mixture) recited in the instant claims, i.e., as a nutraceutical food product, or a topical

Art Unit: 1621

ointment, has not been given much patentable weight, and as such, the mixture disclosed by Spino et al anticipates the instant claims.

Claims 52-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Fringuelli et al (Synthesis, 1996).

The reference discloses a mixture of hydroxy esters of formulae (6a) and (6b) [p1208, scheme 1]. The intended use of the composition (mixture) recited in the instant claims, i.e., as a nutraceutical food product, or a topical ointment, has not been given much patentable weight, and as such, the mixture disclosed by Fringuelli et al anticipates the instant claims.

The rejection are based on the compound of formula (I) produced by the process of claim 1 in US 6,677,462, which is the patent derived from application number 09/923,462, the parent of the instant patent application.
